About Me

I am a passionate front-end developer with over three years of experience in building and designing modern web applications. My expertise lies in using technologies such as React.js, Next.js, and Tailwind CSS to create user-friendly and responsive websites. Additionally, I have experience with Node.js and Express.js for backend development.
I thrive in collaborative environments and enjoy being part of a professional team that challenges me to grow and improve. I am dedicated to continuous learning and staying updated with the latest industry trends and technologies. My goal is to contribute effectively to my team, delivering high-quality code and innovative solutions while constantly honing my technical skills.

Certifications

Certified React.js Developer   2024

Tehran Institute of Technology
100 Score

languages

English   Beginner

Experience

Front-End Developer   2023 - 2024

Kheradmen Startup

I was responsible for designing and developing user-friendly websites using React.js, Next.js, and Tailwind CSS. I contributed to enhancing UI/UX design, which improved the user experience and visual appeal of the applications. I also implemented and integrated RESTful APIs using Node.js to ensure smooth data exchange between the front-end and back-end.
Throughout my time, I encountered challenges with coordinating different sections of the team and managing project timelines effectively. I worked closely with team members to overcome these challenges. Additionally, I identified and resolved various bugs and issues in the projects, which helped in improving the quality and performance of the software. My role involved effective collaboration with the team to streamline workflows and enhance overall project efficiency

Freelance Front-End Developer   2023 - 2024

Ooka Brand

I was responsible for designing and developing a website for the European brand Ooka using Zoho CRM, HTML, CSS, and JavaScript. I focused on improving the website's functionality and visual appeal, ensuring a smooth user experience.
I encountered challenges with limited resources and few developers familiar with Zoho CRM. I managed these issues by effectively using available tools and addressing bugs and technical problems. Working closely with the client was essential for aligning requirements and making necessary adjustments.
This project enhanced my problem-solving skills and adaptability with new technologies.

Freelance Front-End Developer   2023 - 2024

Dental Clinic

Developed a professional website for a dental clinic using Next.js and Tailwind CSS, featuring a blog section with WordPress. I focused on creating a visually appealing and user-friendly site to showcase the clinic's services and content.
A key challenge was integrating WordPress RESTful APIs with the Next.js application. Successfully managed this to ensure smooth data flow and enhance my skills in API integration and multi-technology solutions.

Personal Projects   2023 - 2024

I have been working on various personal projects showcasing my skills in both front-end and back-end technologies. This includes:
- Back-End Projects: Developed scalable applications using Node.js and Express.js.
- MERN Stack Projects: Built full-stack applications with the MERN stack (MongoDB, Express.js, React.js, and Node.js), integrating front-end and back-end components.

These projects cover a range of functionalities, including portfolio websites, interactive web applications, and UI/UX improvements. I focused on best practices in code quality, design, and user experience.

Education

Associate Degree in Software Engineering   2023 - 20--

Islamic Azad University, Pardis

I have been studying for an Associate Degree in Software Engineering at Islamic Azad University, Pardis Branch, since 2023. I chose this university to continue my education and deepen my expertise in software development. Despite being accepted into the University of Tabriz, I decided to stay in Tehran and pursue my studies here to be closer to the vibrant tech community in the capital.
